## New Absolute Filter for Test Benches According to ISO 5011 for Inlet Air Cleaning Equipment for Internal Combustion Engines and Compressors (replaces plane round filters)

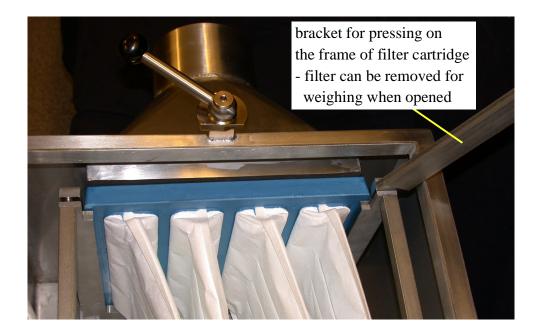

- two versions for flow ranges up to 20 or up to 30 m<sup>3</sup>/min
  - -> quick mounting and removal of filter (approx. 90 % time saving)
  - -> no dismounting of test bench for weighing of absolute filter
  - -> handling from both sides
  - -> saving costs through multiple usage of absolute filter
  - -> low tara of filter cartridge (approx. 600 g) for exact weighing

two handle for easy opening from both sides
